Hi Ravi and Erika,

Thank you for meeting on June 11th to discuss the T25 sediment results. Attached is a table that shows all of the sediment samples collected and our suggested Tier 2 triggers with rationale for each location.

The actual sample location figure, preliminary (unvalidated) chemistry results table, and boring logs are included to assist with your review.

Let us know if you have any questions or need additional information. Upon EPA's approval we will request analysis of these additional samples.

Thank you,

Joy Dunay
